English - B2

Russian - Native

PROFILE

I'm a Java developer with no commercial experience, but who dreams in Java and a solid grasp on web services and complex application development. Excited to start my career by joining a team of passionate professionals dedicated to innovating banking services.

INTERNSHIP

Intern Java Developer at LWO

Nov 2023 – present

LWO an international IT company that develops, implements and develops software solutions in the field of Fintech and for large corporate clients.

Duties:

- I contributed to banking processing development as **one of five** backend developers in a large team.
- Covered **70%** of the application with JUnit/Mochito tests.
- Mastered IntelliJ IDEA, enhancing development speed by **20%**, entirely mouse-free.
- Developed a service to handle interactions with distributed systems. The aim was to synchronize operations between our system and the external service, with the goal of eventually achieving a **20%** performance improvement and complete independence from the external service.
- Monitoring and analyzing log data on Zabbix;
- Participated in meetups.
- Suggested new improvements.

Stack: Spring Data JPA, Spring Boot, Spring Security, Spring cloud, Spring AOP Kafka, PostgreSQL, JUnit 5, Mockito, Flyway, Git, GitLab, Postman, Docker, Zabbix, CI/CD, Maven.

EDUCATION

Belarusian State University Of Informatics And Radioelectronics

2020 – 2024
